Sandeep · Qtonix Software Pvt. Ltd.

SCOPE

Technical · On-Page · Off-Page · Competitors · AI

AUDIT DATE

11 Oct 2026 · v1.0

Qtonix.

INSIDE THIS REPORT

Table of Contents

Each chapter shows what we checked, what we found and what we recommend. Screenshots are taken from the tools we use for every audit.

01 **Overall Site Observation**
Health score, top issues and what is already working

02 **Search Visibility Stats**
Organic traffic, keywords and Google index check

03 **Technical SEO Stats**
Meta robots, robots.txt, XML sitemap, response codes

04 **Page Performance & Mobile**
PageSpeed, Core Web Vitals, page size, responsiveness

05 **On Page SEO Stats**
Titles, descriptions, headings, images, schema, social tags

06 **Content Quality & Trust**
Dummy text, testimonials, thin pages, E-E-A-T

07 **Site Architecture**
Menu, URLs, internal linking and page structure

08 **Off Page Stats**
Backlink profile, authority and link opportunities

09 **Competitor Overview**
How the market looks in search

10 **Keyword Opportunity Map**
The searches each page should target

11 **AI Search Visibility**
ChatGPT, Perplexity, Gemini and Google AI Overviews

12 **Tracking & Social Profiles**
Analytics, tag manager, pixels and social media presence

13 **Action Plan & Approval**
What we need from you to get started

OVERVIEW

Overall Site Observation

01

A quick look at where oilchef.com stands today, before the campaign starts.

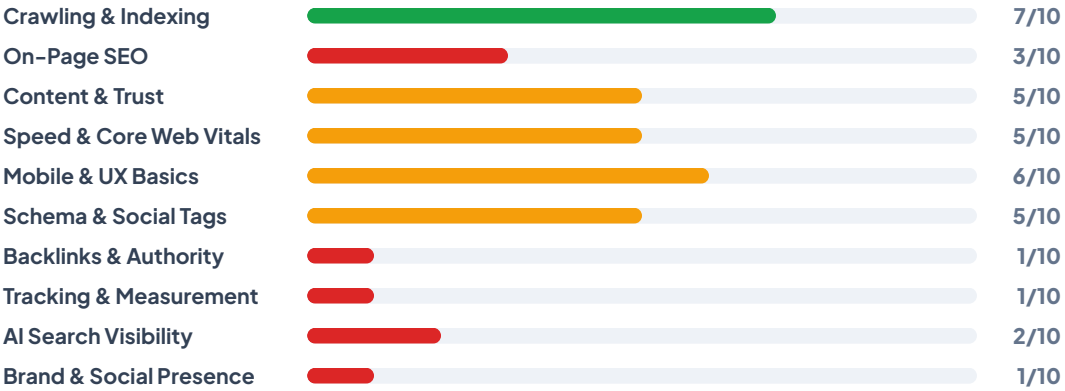

36	14	53	10/43
overall health score (out of 100)	pages found in the XML sitemap	mobile page-speed score (PageSpeed)	homepage images missing alt text

1.1 Homepage | oilchef.com

The homepage was reviewed as part of this audit.

1.2 SEO Health Score | Qtonix audit checklist

36
out of 100

Each area is scored out of 10 based on the checks in this report. The total gives a **starting score of 36 / 100**. Once the Week 1 fixes are live, the score can realistically pass 50.

1.3 Top 5 Issues That Matter Most

#	Issue	Priority

1.4 What Is Working vs What Needs Fixing

What is already working

What needs fixing

1.5 Quick Summary

Element	Status	Remarks
Website visible on Google / Bing	PASS	No noindex block
XML Sitemap	PASS	Found
Robots.txt	PASS	Present
HTTPS / SSL	PASS	Active
Canonical Tags	PASS	Present
Meta Titles optimized	FAIL	"Oil Chef"
Meta Descriptions	PASS	Present
Schema Markup	PASS	Organization
Open Graph / Social Tags	PASS	Present
Mobile Friendly	PASS	Viewport set

Key Takeaway CRITICAL

The audit identified the key issues to fix before the campaign starts.

About This Report

This report shows where oilchef.com stands today. Every fix listed will be carried out by the Qtonix team once you approve the plan.

1.6 How to Read This Report

Label	Meaning
CRITICAL	Stops the site from ranking at all. Fix before anything else.
HIGH	Holds rankings or conversions back. Fix in the first month.
MEDIUM	Worth fixing as part of ongoing optimisation.
GOOD	Working correctly. No action needed.
INFO	For reference or baseline, no direct action needed.

CHAPTER

Search Visibility Stats

02

Current organic traffic, keywords and whether Google has the site in its index.

2.1 Overall Site Stats | SEMrush

Current Observation

INFO

- Organic traffic, keyword rankings and domain authority will be confirmed from SEMrush.
- These figures form the baseline we will grow from.

2.2 Google Index Check | site:oilchef.com

Current Observation

INFO

- The main pages (home, contact, products, about) are set up to be indexed.
- The exact number of indexed pages will be confirmed from Google Search Console.

CHAPTER

Technical SEO Stats

03

Can search engines find, crawl and index the website?

3.1 Meta Robots Tag | Page Source

Current Observation GOOD

No noindex block found on the homepage.

3.2 Robots.txt | oilchef.com/robots.txt

Current Observation MEDIUM

A robots.txt file is present. AI crawlers (GPTBot, PerplexityBot, ClaudeBot, Google-Extended) are not blocked, which is good.

3.3 XML Sitemap | Browser

Current Observation GOOD

An XML sitemap is present and lists 14 pages, organised as a sitemap index across 2 child sitemaps (each child groups a set of pages — they are not pages themselves). This gives search engines a clear map of the site.

3.4 Response Codes & Links | Screaming Frog

3.5 Technical Checklist

Check	Status	Finding
Meta robots tag	PASS	Indexable
XML sitemap	PASS	Present
Robots.txt	PASS	Present
HTTPS / SSL	PASS	Active
Canonical tags	PASS	Present
Mobile viewport	PASS	Set

CHAPTER

Page Performance & Mobile Usability

04

How fast the website loads and how it works on mobile.

0.73 MB	43	10
homepage size (target under 2 MB)	images on the homepage	images missing alt text

4.1 Page Performance: Mobile | Lighthouse

Current Observation HIGH

The mobile performance score is 53/100 and the layout shift (CLS) score is 0.116. Google uses these as ranking signals, so improving them is a priority. Our team will work on image sizes, render-blocking files and server response time.

4.2 Page Performance: Desktop | Lighthouse

Current Observation HIGH

The desktop performance score is 67/100. Desktop is usually faster than mobile; the same speed fixes will lift both.

4.3 Core Web Vitals | Google PageSpeed Insights

Metric	What it measures	Good target	This site
LCP	How quickly the main content appears	2.5 s or less	18.4 s
INP	How quickly the page reacts to a tap	200 ms or less	~890 ms TBT
CLS	Whether the layout jumps while loading	0.1 or less	0.116
TBT	Total time the page is blocked from input	200 ms or less	890 ms
Speed Index	How fast content is visually populated	3.4 s or less	9.2 s
Performance Score	Lighthouse lab test, 0 to 100	90+	Mobile 53 / Desktop 67

4.4 Mobile Usability | Responsiveness

Current Observation GOOD

The website is mobile friendly and the layout adjusts well. We will re-test on real devices after the speed work.

CHAPTER

On Page SEO Stats

05

Titles, descriptions, headings, images, schema and social tags.

5.1 Meta Title & Meta Description | Homepage

HOW THIS PAGE LOOKS IN GOOGLE

oilchef.com

Oil Chef

No meta description set — Google will auto-generate a snippet from page text, which is usually weaker.

Current Observation

HIGH

- Title: "Oil Chef" (8 chars) — short, room to add keywords
- Meta description: present (0 chars)
- H1 tags: 1
- Images: 43 on the homepage, 10 missing alt text
- Schema types: Organization
- NAP (name / address / phone): phone +1 800 555 1234 · email info@oilchef.com · address 123 Market Street, London

Brand name consistency

HIGH

The brand name is written inconsistently across the site: "Oil Chef" vs "OiL Chef". Pick one exact spelling and use it everywhere (header, footer, titles, schema) so search engines and AI tools treat it as one consistent brand.

5.2 Schema Markup | Rich Results Test

Current Observation

GOOD

Schema found: Organization.

5.3 Social Tags | Open Graph

Current Observation

GOOD

Open Graph tags are present.

5.4 Images | Crawl

Current Observation HIGH

- Images on homepage: 43
- Images missing alt text: 10

What Qtonix Will Do (on your approval)

Add descriptive alt text to all images and compress large files.

CHAPTER

Content Quality & Trust

06

Google rewards Experience, Expertise, Authority and Trust (E-E-A-T).

6.1 Content Review

Current Observation

GOOD

- Homepage word count: 981 — a healthy amount of content
- HTML-to-text ratio: 6.0% — low, the page is heavy on code vs. readable text
- Content vs. title/description: checked against the homepage title and meta description
- Writing quality: reviewed for spelling, clarity and signs of thin or auto-generated copy

Brand consistency (E-E-A-T)

HIGH

The brand name appears in more than one form (Oil Chef / OiL Chef). Inconsistent naming weakens trust signals; we will standardise it across every page.

What Qtonix Will Do (on your approval)

Our content team will write SEO-friendly content for every main page (300+ words each), fix any spelling or clarity issues, align copy with the target keywords, and remove placeholder or thin text.

CHAPTER

Site Architecture

07

Menu, URL structure and how pages link to each other.

7.1 Architecture Analysis

Element	Finding
Pages in the sitemap	14 URLs across 2 child sitemaps
Internal links on homepage	28
Canonical tags	Present — helps avoid duplicate content
URL style	Readable, keyword-friendly URLs are recommended across all pages

7.2 Structure Notes

Current Observation

INFO

The site's main sections are reachable from the top navigation. As new content pages are added, our team will plan a clear category structure and internal-linking plan so both visitors and search engines can find every page easily.

CHAPTER

Off Page Stats

08

Who links to the website today, and how strong those links are.

8.1 Backlink Status | SEMrush

8.2 Website Authority | Moz

CHAPTER

Competitor Overview

09

How the market looks in search.

9.1 Competitor Traffic | SEMrush

9.2 Where You Can Win

Competitor strength	Your opening
Big players own broad terms	Target niche, buying-intent searches first

CHAPTER

Keyword Opportunity Map

10

The main search phrase each page should focus on.

10.1 Proposed Keyword Targets | For approval

Page	Primary keyword	Supporting keywords	Difficulty

10.2 Keyword Research | SEMrush Keyword Magic Tool

CHAPTER

AI Search Visibility

11

ChatGPT, Perplexity, Gemini and Google AI Overviews.

11.1 AI Answers | ChatGPT + Claude (live query)

Current Observation INFO

AI assistant results could not be retrieved for this report. Our team will run these checks manually and include them in the first monthly report.

11.2 AI Readiness Checklist

Check	Status	Finding
Indexed in Google and Bing	PASS	Indexable
AI crawlers allowed	PASS	Not blocked in robots.txt
Organization schema with social links	PASS	Present
Answer-friendly content (FAQs, guides)	FAIL	To build

What Qtonix Will Do (on your approval)

Get the website indexed, add answer-friendly FAQ content and schema, and work on listings and article mentions so AI tools start recommending the brand.

CHAPTER

Tracking & Social Profiles

12

Analytics setup and social media presence.

12.1 Tracking & Analytics | Page source

Tool	Status	What it does
Google Analytics 4	PASS	Measures visitors, traffic sources and conversions
Google Tag Manager	PASS	Manages all tracking tags in one place
Google Search Console	UNKNOWN	Shows how the site performs in Google search (verify from the account)
Bing Webmaster Tools	UNKNOWN	The Bing equivalent of Search Console
Meta (Facebook) Pixel	FAIL	Tracks visitors for Facebook/Instagram ads
Other tools	NONE	None detected

Current Observation

INFO

Some tracking is already installed (GA4), via Google Tag Manager. Our team will confirm it is recording correctly and fill any gaps. Search Console access can only be confirmed from the account itself.

What Qtonix Will Do (on your approval)

Confirm or set up Google Analytics 4, Google Tag Manager, Search Console and Bing Webmaster Tools, with conversion tracking for the actions that matter to the business.

12.2 Social Profiles

Profile	Status	Link
Facebook	PASS	x
Instagram	FAIL	—
Twitter	FAIL	—
Youtube	FAIL	—
Tiktok	FAIL	—
Linkedin	FAIL	—

CHAPTER

Action Plan & Approval

13

What we will do after your approval, and what we need from you.

13.1 What We Need From You

Approval

- Approval of the items in this report
- Approval of new page content before it goes live

Access (whichever suits you)

- Either share website admin / hosting access directly,
- or introduce us to your developer and we will coordinate the changes with them.
- Plus access to any existing Analytics / Search Console accounts, or a report export.

CHAPTER

Method & Glossary

A

How this audit was done and what the SEO terms mean.

A.1 How This Audit Was Done

Area	Source and date
On-page & technical checks	Automated crawl of the live site, 11 Oct 2026
Page speed	Google PageSpeed Insights
Backlinks & competitors	SEMrush (from uploaded screenshots)

A.2 Glossary

Term	Plain meaning
Indexing	Google saving a page so it can appear in search results
noindex	A tag asking search engines not to show a page
Meta description	The short summary shown under the title in Google
Schema markup	Code that describes a business or page for search engines
Core Web Vitals	Google's speed and stability measurements
E-E-A-T	Experience, Expertise, Authority, Trust: how Google judges quality

Qtonix.

THANK YOU

Let's get Oil found on Google and AI search.

Thank you for the opportunity to review your website. We're happy to walk you through every finding on a call.

NEXT STEPS

01

Review the report

See where the website stands today and note any questions.

02

Approve the plan

Confirm the items in "What We Need From You" (chapter 13).

03

Access & kick-off

Share access or connect us with your developer, and our team takes care of the fixes.
